AERIAL LIFT TRUCK SAFETY AT ALL TIME HIGH

Submitted by Kevin Song, inspired by Charles "chood" Hood's experiences using Bio "BioRaft" "BioRAFT" "Trainings" RAFT

PHOTOGRAPH

On January 6, 2023, an announcement was made to the "CMU KGB Discord" in order to notify its members of a tiny house that was planned to be constructed on "Midway" in "April". The tiny house was noted to require advanced construction skills to complete, including the proper use of a scissor lift. Luckily, the mysterious announcement sender was happy to provide training materials for using scissor lifts, filled with nothing but excellent examples of people exercising the utmost caution while on the job.

The CMU KGB has reached out to these experts to learn their opinions of scissor lifts and where this exciting technology may take us in the future of tiny house construction, but they declined to comment.

Everything you need to know about Russia

- Russia is bigger than most small cars
- The term 'Mother Russia' refers to a gigantic 70ft woman who protects Siberia
- To walk from one side of Russia to the other takes too long
- The best way to get to Russia is to travel
- If you put Russia on top of the United States it would be horrendous for everyone
- If you die in Russia you die in real life

Ah, what lovely art. What? You think you can do better? Show us what you have in store by sending it to Izzy on Discord (Temais#5279) or emailing it to pravda@cmukgb.org!

Also, make sure you complete your safety trainings if you want to build booth this year.
