ANIMAL FACTS RAMPANT, NO HOPE OF CONTAINMENT

Submitted by Izzy Shaw

Cool bug Fact's

On January 23, 2023, an enterprising KGB member shared the organization's first recorded Animal Fact at an otherwise unremarkable GBM. An ad hoc committee was quickly created to house the Fact and streamline it into the meeting procedure, but more members soon joined in with their own Animal Facts. All hope for the GBM seemed lost, until the Tyrant forcibly ended the committee reports and moved on.

Quick Animal Facts:

Most of the time, it's nice to be
a musk ox

However, this would not be the last time Animal Facts would come to a GBM. The very next week, on January 30, a new set of enterprising KGB members brought a new set of Facts, and by February 13, ad hoc committee members had created an ad hoc newsletter to more efficiently share Facts and sent it to all GBM participants. The Tyrant may end committee reports, but he can never truly stop us. We thank you for subscribing to Animal Facts, and we hope to bring you nothing but the best and most interesting Facts in the future.

Facts That Are Not About Animals

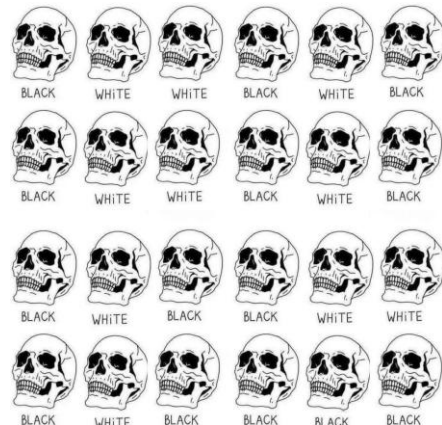

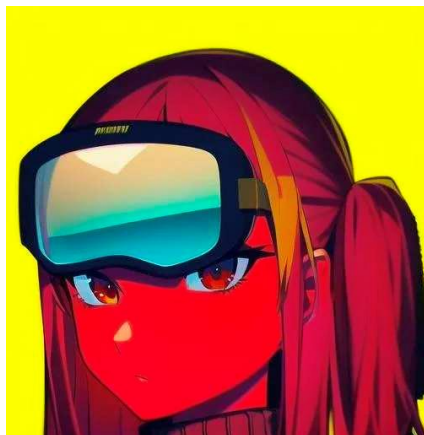

write a 600 word article in the ap style about the high rates of student depression at marnege cellon state college

Carnegie Mellon State College is known for its strong academic programs and high-achieving student body, but a growing concern among students, faculty, and administrators is the high rate of student depression at the university. According to recent studies, nearly one in five college students experiences depression, and the numbers are even higher at Carnegie Mellon.
