DANIEL YIN FOR STUDENT BODY PRESIDENT

In the 2023 student government coup d'état, CMU senate ousted the role of student body president, in favor of a more powerful senate and a "senate president." In 2025, our beloved former president and current 2Veep Daniel Yin unsuccessfully ran for senate president. What? Why would senate reject such a handsome and charming rookie senator to become their president? Are they stupid? I think it's about time to take our revenge and

Doesn't this man look so trustworthy?

show senate who's really boss by reinstating the position of student body president. This time, with lifetime appointments. And who better to fill this position than Daniel Yin? Through his hard work as KGB president, Daniel has proven to us that he has the guts, the drive, and the passion to truly rule over us all. He can finally show senate what he's made of! Now, some concerned Pravda? readers may question the lifetime appointment clause. That's the best part! As with all dictators and monarchs, as long as they're good, there's nothing to worry about. And Daniel is as good as they get. So many more generations of students can bathe in the glory of his leadership. Daniel, in his humble nature, may hesitate or even reject this proposal. He may not want to stay at

CMU for the rest of his life. KGB does not care. As some say, the best rulers are the ones without desire for power. We will instate Daniel no matter his protests, and we'll ensure he has no option for resignation. In order to achieve this dream, our one option is to confront the man in charge: Farnam Jahanian. How will we convince him? Well, we all know one thing that Farnam likes, and it's money. All we need to do is gift Farnam his annual salary of \$2.5 million, and he'll do anything we ask. With donations from readers like you, we're mere moments away from total KGB domination of CMU.
