CMU DECLARES WAR ON SELF-DRIVING CARS

Submitted by: Daniel Yin

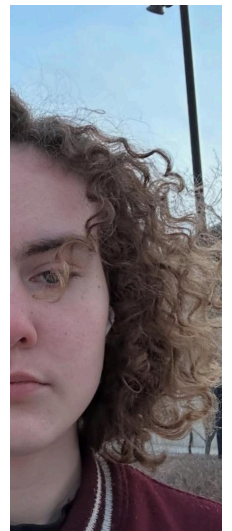

Self-driving cars have long been a dream of Americans, who are too stupid for trains and buses. However, efforts to bring self-driving cars to reality are hampered by many challenges, such as cars' hunger for children. In a bold move, CMU, the most famous AI-hating school known for banning it in classes because it is too woke, has come out against self-driving cars. Only humans may drive cars on CMU's campus, which will ensure that rather than running into children, the drivers will attack anything that moves as well as children.

IS BENNER ROGERS WASIAN: AN OFFICIAL INVESTIGATION

Pravda? has received many inquiries on the genealogy of our president, Benner Rogers. Primarily the question if she is wasian, or just white. Pravda? has completed an independent investigation into this, and we have concluded that Benner *is* wasian. How have we come to this conclusion? We present our process thus:

The first and most visual evidence we collected is that of facial structure. This is the thing that has lead many to suspect Benner's background. First, let us see the left half of the face. It is fairly trivial to say that whomever this is belongs to a caucasian

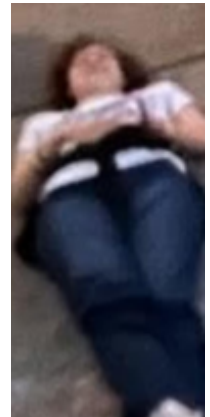

background. The shape of the eye and cheek are proof enough. But now let us examine the right half of the face. We can immediately see the difference. The eye is more slanted, the eyebrow is thinner, the cheekbone is higher. All obvious signs of an asian woman.

However, this is hardly evidence enough, as faces can look different all the time. We asked our local Phrenology expert, who has asked to stay anonymous, to look into this. Sneaking into her dorm while she was sleeping, we were able to receive a full scan of Benner's skull. After studying its shape and structure, our Phrenology expert says, "yeah this is definitely the skull of a wasian person, no doubt." Since we all know Phrenology is only the most highly respected and revered science of the modern day, with absolutely no racist or eugenic origins, we can certifiably confirm that Benner has Asian DNA.

Speaking of DNA, some may ask why we did not look into a genetic study of her ancestry.

This investigation has confidently shown that Benner must be wasian, without a sliver of doubt. We hope this puts a conclusion on all arguments and debate.

Benner asleep
