OFFICIAL BIGFOOT INVESTIGATION

A counterfeit edition of Pravda? has recently been posted in the KGB discord. This illegal Pravda? claims an individual matching the physical description of Bigfoot was seen posting Pravda? on trees and lampposts near the CMU campus. We have reached out to the supposed editor of this article “bigfoot@andrew.cmu.edu,” however we have not heard back. In spite of this, we have pressed many hours searching campus for this faux editor. We have a report that this individual may have been seen in the steam tunnels at 4:27 AM on Tuesday, November 19, however this claim has not been substantiated. We have sent teams deep into Schenley Park scouring for this individual with the greatest technology and weaponry KGB has to offer: 27 different high-powered NERF guns. These teams have recovered forensic footprint

evidence which qualitatively matches the description of “size 23 shoes.” We sent a member to Connecticut to compare this evidence with previously collected official Bigfoot footprints, which can be seen on the right. They were a perfect match. This has confirmed that our suspect is, in fact, Bigfoot, rather than a Bigfoot-like imposter. This search will continue and KGB will not rest until Bigfoot is detained safely in the Kage. Once

Bigfoot is captured, if all goes to plan, we will get him to join KGB to finally make BoothBuggy real, as only Bigfoot would be strong enough to push a BoothBuggy.

A computer render of our potential BoothBuggy success has been provided below. With the power of Bigfoot on our side, we can win every category at the spring

carnival awards. Take that SCC! Now, if Bigfoot is reading this, we have but one message: lay down your weapons, and we will lay down our 27 high-powered NERF guns. The spread of illegal Pravda? is a crime some deem unforgivable, but KGB

has decided that Bigfoot can redeem himself with the right course of reformative action. We believe that this course of justice will be better for all parties involved. We know Bigfoot has a strong sense of personal privacy, but we think we can work something out. However, authorities at the Kremlin have given the order that if Bigfoot does not comply, KGB will need to amplify our search. We may end up calling upon Kevin's Discretionary Nuke Fund if the need shows itself, but that will only be considered in the direst of circumstances. So, if Bigfoot still reads this, know that we will not rest until you are found and help us win every single category in both booth and buggy.
