Do you like robots? Are you interested in building a robot? Take the StuCo, "98-012: Fun with Robots", next semester! Due to, circumstances?, I (Kevin, kevinson, evin, even) ended up as an instructor for the class, and so I am shilling for the class now. Also, this is not a joke.

Legitimately, if you're actually interested in building a small lil robot in a low-stress low-stakes mini-mini-class, you should take FwR. It'll be cool, trust me! (and if you complete the course, you get to keep the robot! (note: there's a \$10 lab fee at the start, but like, if that's a significant financial obstacle, dm me)). thanks - kevinson
